

# Responsible operations

## Responsible operations

We invest in environmental sustainability, while protecting worker health and safety:

over  
**99%**

of Phosboucraa's energy consumption comes from the wind farm of Foug El Oued (in the Sahara), saving more than 80.000 tons of CO<sub>2</sub> emissions per year

Total desalination capacity of 8,5 Mm<sup>3</sup>/year with large excess water to be redistributed to the local community and the region

Power cogeneration with excess energy destined to increase Phosboucraa's ability to desalinate water

Co-development of world-class health and safety policies with Dupont de Nemours through OCP's joint venture "DuPont OCP Operations Consulting". Employees and contractors training on HSE priorities, and integration of HSE performance criteria into the evaluation and selection of our subcontractors. Protect & Sustain Certification issued by the International Fertilizer Industry Association.

Preservation of the phosphate resources to increase the lifespan of Phosboucraa's reserves from **51 years to 81 years**

“ *Our field visits to Boucraa, Laayoune, Foug El Oued and the figures provided to us confirm the materiality and advanced level of Phosboucraa's commitment to human and territorial development.* ”

vigeo eiris **Corporate Social Responsibility Assessment 2016, Vigeo Eiris**
